

**Important:**

- This article explains How to enroll a device to AirWatch.

## Requirements

- Brand New iPad that is part of the DEP (Device enrollment Program)
- A recently wiped Device.
- User Name and Password of the person the device is being assigned to.

A Video of the process is available

<https://vimeo.com/apstechintegration/review/168980620/5d183d56da>

## Process

1. Select the Language
2. Select your Region
3. Select your wireless
  1. If you are at any APS location, please select “**APS**” wireless SSID
  2. Tap on **Trust** on the certificate window
4. Tap on **Enable Location Services**
5. Tap next on the following screen (The message on the screen is telling you that APS will configure your device)
6. Enter the credentials of the user the device is being assigned to. (NOTE its important that only the credentials of the intended user are used in this step)
7. Tap on **Get Started**
8. The Device is now enrolled and ready to go.
